

Financial Information

TELEKURS **iD**

Your intelligent display.

**Telekurs iD, SIX Financial Information's all-inclusive flagship product, is ideally suited for monitoring markets and screening investments. This intelligent display application delivers market data, business news and a whole host of proprietary financial analysis for wealth managers, securities administrators and asset managers.**

# Information for all your needs

Telekurs iD is a functional terminal display application that offers the entire range of SIX Financial Information's data and services, from reference data, corporate information and global market data, via business news, right through to investment product valuation and risk management information.

Striking for its ease of use, Telekurs iD streamlines and organizes financial information and supports your efforts to monitor and analyze markets to screen potential investments. Bundled proprietary analysis from specialist providers such as FactSet, Infincials, RepRisk®, theScreener, ICAP and Tullett Prebon, and a variety of global and local news agencies complete the broad content offering. Telekurs iD is available as a mobile app so you can stay informed on the go as well.

## Key Benefits

- **Completeness:** Access to the entire range of data from SIX Financial Information, including data from leading third party providers.
- **Flexibility:** Choice of three packages to best suit your research, analysis and screening needs.
- **Continuity:** Secure access via web-browser and mobile applications for 24/7 access.
- **Convenience:** Numerous easy-to-use functions and enhanced features to support your specific needs.
- **Closeness:** Multiple language choices for news delivered by leading global and specialist local providers.

# Functional packages

SIX Financial Information offers three Telekurs iD packages suited to different functions within financial institutions to best meet your particular requirements. The three packages are the Wealth Management Package, Reference Package and Asset Management Package.

The Wealth Management Package builds on the basic configuration of data and functions common to all Telekurs iD packages and is designed to meet the needs of financial advisors. The emphasis is on information that provides optimal support for your investment decisions (including modeling of mathematical operations) with access to your data wherever you may be.

The Reference Package is suitable for users in the securities management sector. This package has a particularly user-friendly and powerful search function for securities, prospectus data, information about prices and previous or pre-announced events. It also offers data which lets users check executed transactions against regulatory requirements. Furthermore, the Reference Package supports valuation of assets according to various criteria. As with the Wealth Management Package, the Reference Package builds on the basic configuration of data and functions common to all three packages.

\* daily closing or delayed prices

\*\* not available in the USA, United Kingdom and Ireland

---

## Basic configuration of all three packages

All packages have the following features: Screens, Quote Lists, Styles, Single Quote, Orderbook, all sources, Option Chaining, Option Calculator, Bond Calculator, Chart, Limit Minder, Watchdog, Portfolio, Ticker, free quotes, regulatory news, Forex and Money Market Contributors\*, Yield Curves, advanced search for instruments and news, ICB (Industry Classification Benchmark), historical prices for up to 10 years, time series up to 10 days, S&P ratings and Telekurs FinXL (Microsoft Excel tool).

---

### Wealth Management Package

This package includes a local, internationally-oriented news service, TheScreener, Hoppenstedt, Zacks, RepRisk RPI, FactSet Estimates (4-year forecast) and Fundamentals (2 years), Infiniti GPRV, Valordata Select and Telekurs iD Mobile\*\*.

### Reference Package

This package includes complete securities data, corporate actions, institutional data and corresponding search tools, evaluated prices and access to all term sheets and time series up to 180 days.

### Asset Management Package

This package includes local and English-language news services, Infiniti Corporate Focus, Forex and Money Market Contributors in real-time, more than 10 years' worth of historical prices, Rating History, RepRisk®, expanded FactSet Estimates (5-year history and 4-year forecast) and Fundamentals (5 years). It is the most comprehensive package and includes all the functions of the other two packages.

The Asset Management Package is the most comprehensive of all Telekurs iD packages. It delivers all the data and functions included in the other two packages, and adds an extended news service plus extended corporate key figures – helping you be fully prepared for all your investment decisions.

#### **Telekurs iD Mobile**

When you are away from your desk, Telekurs iD Mobile gives you access to quotes, charts, news and your saved user lists. iPhone and BlackBerry applications and HTML for browser-based mobiles are available as free optional extras for all customers.

#### **Java and html**

Telekurs iD is available as a Java applet and in an HTML version. Use the Java applet when you want to get the full benefit of everything Telekurs iD has to offer. The HTML version can be used by companies which only have limited bandwidth for transmitting financial information or whose corporate policy does not permit the use of the Java applet. The HTML version is available for the Wealth Management Package and the Reference Package. If you work with the Java applet in the office, you can also use the HTML version on your laptop, your home computer or even in an Internet café. This means you have access to the best information on the move as well.

#### **Telekurs FinXL**

Telekurs FinXL is part of the dynamic link solutions in Telekurs iD. Fully integrated within Excel, it allows you to insert and edit real-time data functions (GetQuote), historical data snapshots (GetHisto and GetSnap), interpolated rate calculations (CalcRate) and CalcBond for yield-oriented calculations. These functions run exactly as native Excel functions do.

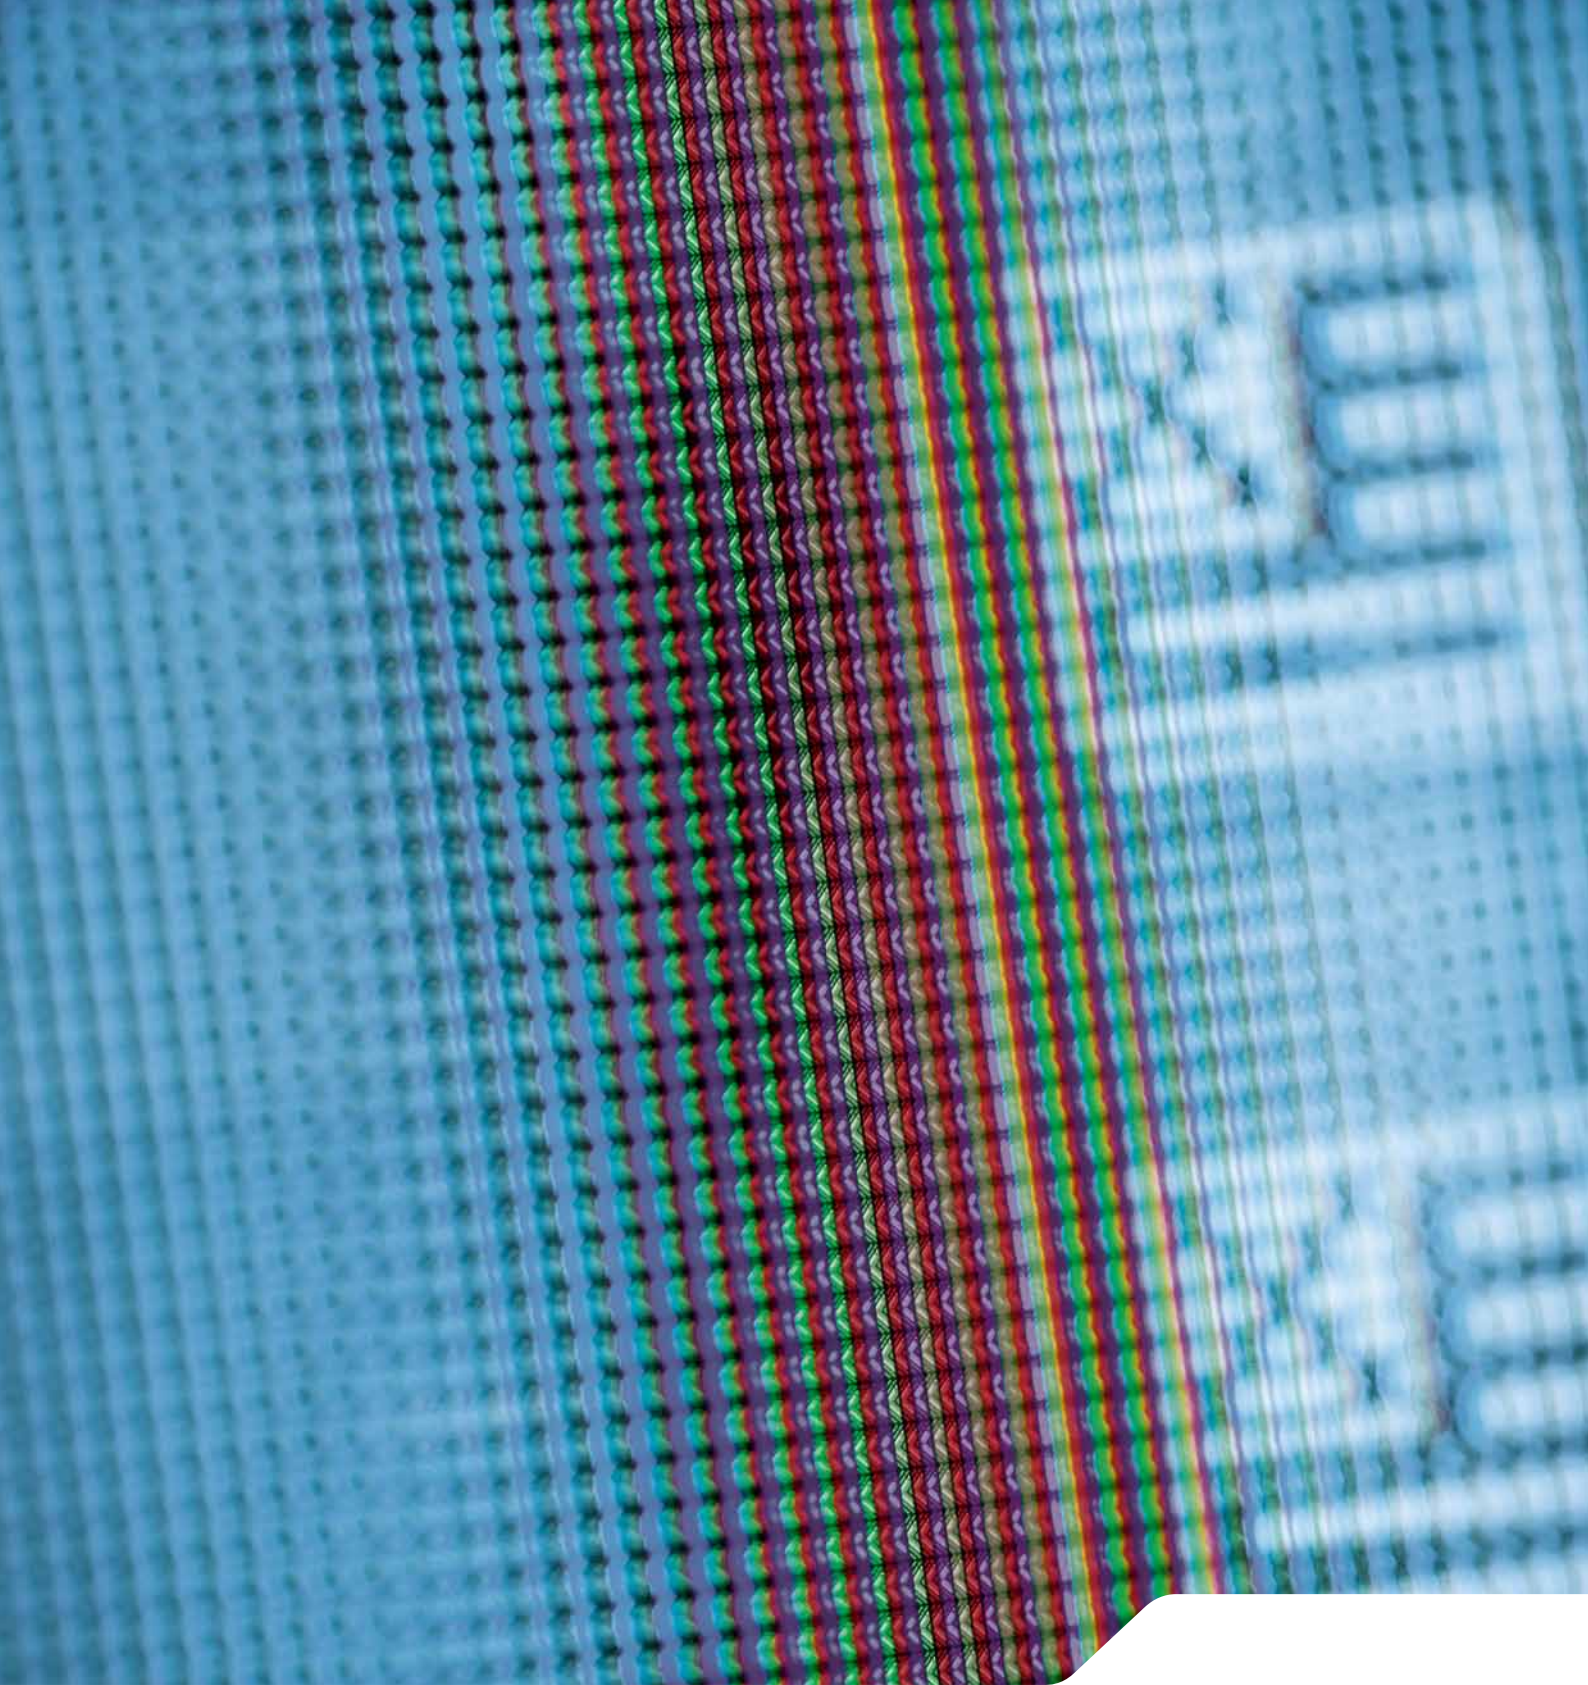

## Your trusted partner

SIX Financial Information sources data directly from over 1,500 global exchanges, multilateral trading facilities and institutional contributors. Its specialized analysts are strategically based in the world's principal financial centers, including New York, London, Zurich, Frankfurt, Singapore and Tokyo. Data is refined in SIX Financial Information's unparalleled data model designed by leading finance experts. Automated and manual plausibility checks, integrity controls and 24-hour monitoring ensure that data from SIX Financial Information meets strict quality standards.

Telekurs iD is one of six core products provided by SIX Financial Information. The key services are Telekurs iD, Market Data Feed (MDF), apiD, Valordata Feed (VDF), Intraday Pricing Service (IPS) and Evaluated Pricing Service (EPS). All deliver high quality data in standardized formats through customizable platforms, covering your needs from the back office through to risk management and into the front office. SIX Financial Information has ranked consistently high in customer satisfaction surveys. Combined with a local presence, global reach and around-the-clock service from data, sales and support teams, you can rely on SIX Financial Information as your trusted partner for innovative solutions.
